Summary

Data Analyst with hands-on project experience in end-to-end data analysis using Python, SQL, Power BI, and Excel. Experienced in cleaning and transforming complex datasets, building interactive dashboards, and delivering actionable business insights through clean methodology, efficient problem-solving, and continuous learning.

Skills

Programming Languages: Python, SQL
Data Analysis & Visualization: Power BI, Tableau, Microsoft Excel, Pandas, Numpy, Matplotlib
Databases: MySQL
Developer Tools: Git, GitHub, Jupyter Notebook
Core Concepts: Data Cleaning, Data Visualization, Exploratory Data Analysis (EDA)

Experience

Data Cleaning & Validation Intern **Mar 2026 – May 2026** *Avacasa* *Excel, Google Sheets*

- Cleaned, validated, and organized real estate developer and project datasets using Google Sheets and Microsoft Excel, ensuring accuracy and consistency across 2,000+ records.
- Conducted online research to verify project details, update missing information (contact details, websites, business records), and identify/resolve duplicate entries, significantly reducing data errors.
- Improved overall data quality and platform reliability through systematic research, validation, and documentation processes.

Projects

Customer Trends Analytics Dashboard — Python(Pandas,Numpy), MySQL, Power Bi, Star Schema Modeling **2026**

- Engineered an end-to-end analytics solution processing 3,900+ customer records using SQL and Python pipelines.
- Reduced manual data preparation time by 35% using automated data transformation workflows.
- Designed Star Schema data models in Power BI, enabling dynamic filtering and drill-through analysis.
- Built interactive Power BI dashboards with customer segmentation and behavioral trend analysis across product lines.

Alzheimer's Detection using Deep Learning (EfficientNetV2M) — Python, TensorFlow/Keras, SPSS **2025**

- Developed a deep learning model using EfficientNetV2M to classify Alzheimer's severity from MRI scans.
- Outperformed DenseNet201, ResNet152, NasNetLarge, and ConvNeXtLarge on accuracy, precision, recall, and F1-score.
- Built TensorFlow training pipelines with transfer learning and data augmentation techniques.
- Conducted statistical analysis using SPSS to support research documentation and publication.

Awards & Certifications

- **IBM Data Analysis Using Python – IBM (2025): Validated expertise in data manipulation, cleaning, and analysis using Python libraries including Pandas and NumPy.**
- **SQL (Certified) – HackerRank (2025): Certified in writing efficient SQL queries for data extraction, filtering, and aggregation.**

Education

Bachelor of Technology (B.Tech) **Graduated: 2026** *SIMATS School of Engineering* *CGPA: 8.2 / 10*
